All of the data can be posted except for the data from August 6th. We will fix that data and resend with Sample Names that do not include the Intake name

All: Please hold any posting on this data set. We have determined that these are drinking water intake samples, that lat long coordinates are not to be posted. I am waiting on instructions from the AC on what, if any, replacement data should be inserted into the spreadsheet.

Terry

The attached file has been reviewed by the EOC HQ EU. We have removed non-metal constituents to be consistent with previous postings. The data is consistent with previous postings and contains no errors.

Once the HQ PI has reviewed the file, they will coordinate posting.
